

WHY US?

✓ Fewer errors

Outsourcing can reduce the number of billing errors, which can increase client satisfaction and maximize revenue

✓ Improved patient satisfaction

Efficient and accurate billing and payment processes can help build trust and strengthen relationships with patients

✓ Reduced costs

Outsourcing can improve workflow efficiency and accuracy, which can help maximize revenue

✓ Focus on patient care

Outsourcing can free up time and effort that would otherwise be spent on billing, allowing providers to focus on other management concerns and provide a higher standard of care

✓ Improved cash flow

Outsourcing can help ensure payments are on schedule and eliminate unpaid claims, which can enhance cash flow and allow for investment in more services

✓ Safeguarding patient data

Outsourcing can provide access to experts who can invest in protecting patient information and minimizing the chance of a data breach

✓ Increased productivity

Outsourcing can help enhance productivity and efficient staff utilization

DO YOU KNOW?

Practices achieve a record revenue growth of up to 30% in the first 90 days with AGMed.

Outsource Medical Billing today to Reduce Errors, Minimize Revenue Holes, and Maximize Collections

At AGMed, we proactively handle charge posting and minimize the time between the date of providing a service & the date of posting. Slow Claims submissions and late incoming payments can be destructive for your practice and we nip it in the bud with our 24/7 available efficient billing & coding team.

We have the strategies and the resources to actively manage & counter

- ✓ Lost revenue in denied claims
- ✓ Unaddressed old claims
- ✓ Delayed and denied claims

WE MAKE YOUR BUSINESS GROW

AGMed is a medical billing firm – deploying the best practices in medical billing, coding, credentialing for physicians looking to outsource billing and coding to an experts.

ALL-IN-ONE

✓ **Medical Billing Services**

Expert patient billers offer the most complete medical billing services that entail handling check-in/out, claims, payments, and denials for health care providers.

✓ **Medical Coding Services**

Clinical coding officers translate patient services into ICD-10 and CPT codes and generate a clean “super-bill” for the biller to submit to the insurance payer.

✓ **Medical Scribe**

Scribes may also gather information for the patient's visit, obtain medical records from other facilities, schedule consults, and track the progress of diagnostic studies. They also alert providers when studies are complete and review charts for proper documentation

✓ **Credentialing Services**

Provider enrollment services by our credentialing specialists help healthcare providers join the network of desirable payers with maximum privileges.

✓ **Healthcare RCM Services**

Revenue cycle management services are specialty-specific, which means a physician's bespoke demands are met by a dedicated medical biller.

“86% of denials are potentially avoidable. 65% of denied claims are not reprocessed for resubmission. What's next?”

Talk To An Expert

RCM, REIMAGINED FOR?
